

Yulun "Alan" Chang

Email: yulunc@uw.edu / alanchang922@outlook.com

Biography

Skilled software programmer with a versatile skill set. Experienced in designing, implementing, and testing code across various languages. Committed learner passionate about solving complex problems with innovative solutions.

Education

- **University of Washington, Seattle**

Applied & Computational Math Science

Fall 2022 - Winter 2026

Track: Discrete Math and Algorithms | GPA: 3.91

Research

Metaprogramming: Provable Computation in Lean

UW Math Ai Lab

Sept. 2025 - Apr. 2026

- Worked under mentor Dhruv Bhatia on formalizing provable algorithms in Lean.
- Researched and implemented innovative algorithms to solve linear algebra challenges, while providing proofs of correctness for each algorithm.

AR2-D2: Training a Robot Without a Robot

UW Robotics and State Estimation Lab

Oct. 2024

- Worked under mentor JiaFei Duan on the AR2-D2 project.
- Implemented depth sensing algorithm on mobile devices to capture precise data points in augmented reality.

Selected Academic Projects

Kaggle Competition | University of Washington

Mar. 2026

- Designed random forests and linear regression models which predicted student success from course data.
- Achieved 97.6% accuracy on the test set.

Compiled Notebook for Differential Equations | University of Washington

Nov. 2025

- Compiled notebook for applications and simulations in python on ordinary differential equations, initial value problems, and second order boundary value

problems. Methods for partial differential equations include finite differences, finite elements, and spectral methods.

Game Playing Agent | University of Washington

Feb. 2024

- Designed an algorithm in python that analyzes states of a connect 4 game.
- Developed a game playing agent that utilizes the game analysis to play the best move against agents of fellow classmates.

Awards

- **UW Annual Dean's List** 2022 - 2026

Skills

- **Languages and Tools:** Java, Python, C++, SQL, R, Lean, Matlab, Solidworks
- **Languages:** English, Mandarin
